

ACTION DECK 2

OVERVIEW

This expansion adds 84 new, unique action cards that replace each of the unique cards from the original action card deck.

HOW TO PLAY

This deck requires PoK. Before you setup the table, place the "Action Deck 2 Loader" tile on the table. Check to ensure there are additional action cards in the deck. After fully completing table setup, check that there are 120 cards in the deck.

LIMITATIONS

Currently there is no scripting for automatic rolls, bonuses, or menu options. As this changes, I hope to update this document with what is and isn't available.

FEEDBACK

If you have any feedback, please visit the TI4 Homebrew Discord and message @Will#1294.

THANKS

Though I'm responsible for many of the cards and their lore text, a sizable chunk is the culmination of the work over on the TI4 Homebrew Discord. I've lost track of the names, but hope to fill in the blanks as I find them: Unfulvio, BradleySigma, Lockreed, Tactic Blue.
